

YAROSLAV MURADIAN

Full Stack Developer

About Me

Flexible, hardworking and very quickly trained.
Eager to work with interesting, dedicated teams
where I will develop interactive user interfaces.

Experiences

January/2003 - May/2023

Intern at SoftServe

BUSINESS DEVELOPER

During my time at the company, I was a part of various projects where I used React and NextJS to develop the front-end of applications. As a developer, I was tasked with creating interactive interfaces and ensuring a smooth user experience with web applications. I actively used React's component-based approach to create reusable UI elements, which contributed to more efficient development and maintenance of the code base.
